ATTENTION DC PEDES ::: YOU WILL NEED BACKUP COMMUNICATION - phone blockers everywhere :::: Check out BRIDGEFY a FREE bluetooth phone walkie-talkie :::: IOS/Android - Download, setup and test!!!! SHARE THIS TO FELLOW CENTIPEDES!

3 months ago by [Tron3k](#) +16 / -0

The more people that use the larger the network will be via bluetooth.

FREE Download here:

Android - <https://play.google.com/store/apps/details?id=me.bridgefy.main&hl=en>

Apple - <https://apps.apple.com/us/app/bridgefy/id975776347>

Detail Info here:

Bridgefy is an offline messaging app that lets you communicate with friends and family when you don't have access to Internet, by simply turning on your Bluetooth antenna. Ideal for music festivals, sports stadiums, rural communities, natural disasters, traveling abroad, and much more.

The 3 ways Bridgefy works:

Person to Person Mode – Turn on your Bluetooth antenna and chat privately with friends that are within 330 feet (100 meters) of you.

Mesh Mode – Chat with people more than 330 feet from you by connecting through other Bridgefy users found in the middle. Example: person 1 can talk to person 3 if person 2 is in the middle, making the possible distance 660 feet (200 meters). The same goes for an unlimited number of people in the chain. Don't worry! Your messages are safe and can't be read by those people in the middle.

Broadcast Mode – Go into the Broadcast section and send messages to every

Bridgefy user around you at the same time, even if you don't have them on your contacts list!

1 Bluetooth can be highjacked easily. Allowing your phone to accept/broadcast is suspect... but we are adults so make your own choice. Handheld HAM for the win.

1 I thought Bluetooth standards say 33 feet not 330, but whatever floats your boat.

0 I'm just telling you that you looked stupid trying to troll me.

▼ Perhaps you can be a team player and post something useful instead of poo pooing everywhere.
Happy New Year!
